---

## Experience

### Hyperdata Computing / Software Engineer - I

July 2019 - Present

**Technologies:** Asp.net MVC, Asp.net Core, React.js, Kafka

**Tasks:** Created MSI Setup for an existing product that deploys the website on IIS and runs the database queries.

Developed a replication management system that checks the database status and generates automatic email.

Implementation of new features in existing system.

Maintenance and bugs resolving in existing system / clients system.

### Learning Pitch / Software Engineer - I

April 2018 - March 2019

**Technologies:** Python, React.js, Javascript, Adobe Premier.

**Tasks:** Maintenance and configuration of MOOC platform i.e. Open edX. Chatbot for student's portal using DialogFlow.

Quiz Management System.

IT Support.

---

---

## Final Year Project

### Stock Price Prediction (*In Process*)

**Technologies:** Python, Machine Learning (Linear Regression | SVM), Deep Learning (RNN | LSTM)

**Details:** Using historical data of different companies we tried to predict the closing price of the shares. We used different ML models and tried to find the best result.

---

## Education

---

**University of Karachi / BSCS / Computer Science**  
2016-2020  
CGPA: 3.24

**Govt. Degree College SRE Majeed / Pre-Engineering**  
2015

**The SET School / Matic / Science**  
2013

---

---

## Extra Courses

**Web Development & Designing / From IBA**

**React Native / From AXIOM**

**Advance Javascript / From SAYLANI**

**Complete Data Science Boot Camp / From Udemy**

**React.js / From Apptron**

**HTML & CSS / W3School**

---

---

## Projects

---

**Salon Ecosystem / React Native**  
2019

I created a mobile app to bring all the salons under one app so that customers can know what services are provided in the salons and they can also rate the salon and give feedback.

**Business App / React Native**  
2019

Created a business app that contains all the information about the business of the client.

**Traffic Light Automation / Using Arduino**  
2017

Completely created and also programmed it.

**School Management System / MVC .Net**  
2017

I have worked using Code First Approach, worked on front and backend both..
